

Introductory Newsletter DECEMBER 2007

In This Issue:

- Introducing Netmon Monthly Newsletters
- Netmon 4.8 Released
- DID YOU KNOW?
- User Support Forums
- HOW TO: find a Spam Agent on your Network
- Netmon & Enviromon Year End Sales

Welcome to the first edition of Netmon's monthly newsletters. These emails will be sent out regularly to keep you informed of improvements, updates and pricing changes for all Netmon products, as well as to provide you with the latest news in and around the networking world. If you have a suggestion for future editions, please let us know.

Netmon 4.8 Released

Early last week, Netmon released version 4.8 which included even more functions for users of the comprehensive product. Major new features included:

- Initial Support for sFlow
- NetFlow v9 Support
- A re-designed Device Explorer
- Domino Server Dashboard

For more information on the new features of Netmon 4.8 as well as the download and installation instructions, [click here](#).

The new [USER SUPPORT FORUMS](#) are becoming a very popular area on the Netmon website. Only active since the release of Netmon SE, these forums have attracted many current and potential customers due to the quick and efficient responses from the technical professionals at Netmon. The forum was launched in the hopes that Netmon users around the world could learn from eachother by discussing standard operation issues and experiences, while also providing suggestions for future releases. This area of the website will soon become the premier location for valuable information for all Netmon products.

If you have a question for the technical staff or perhaps a desired feature, be sure to post it on the [forums](#).

Lowest Prices Ever!

Both Netmon and Enviromon are giving customers giant savings to end the year!

EVERY Netmon Professional Edition is currently priced at **15% OFF** their List Price! That's a **savings of over \$1,100!** [BUY NOW](#)

YEAR END BLOWOUT
15% OFF!

DID YOU KNOW?

.....the majority of HTTP traffic is now used for streaming audio and video. Only 45% of broadband HTTP traffic is used to transmit traditional HTML pages.

DID YOU KNOW?

.....39% of all broadband traffic is peer to peer file sharing.

NETMON offers **real time traffic analysis** so you can be aware of what's happening on your network as it's happening. [FIND OUT MORE](#)

Get more traffic stats from arstechnica.com

HOW TO: find a Spam Agent on your Network

If you suspect a workstation on your network is sending spam, you can use Netmon to find which workstation is the culprit. Spam is sent over port 25 to various mail servers on the internet. You will need to have your Netmon device sniffing traffic from your switch for this to work. First click on the Reports icon in the Netmon toolbar
